# Auditor's Report to the Shareholders of ZIM Integrated Shipping Services Ltd.

We have audited the accompanying consolidated Statements of financial position of ZIM Integrated Shipping Services Limited (hereinafter: "the Company") as at December 31, 2016 and 2015 and the consolidated income statements, statements of comprehensive income, statements of changes in equity and statements of cash flows, for each of the three years ended on December 31, 2016. These financial statements are the responsibility of the Company's Board of Directors and of its Management. Our responsibility is to express an opinion on these financial statements based on our audit.

We did not audit the financial statements of certain consolidated subsidiaries, whose assets constitute approximately 7% and 9% of total consolidated assets as at December 31, 2016 and 2015, respectively, and whose revenues constitute approximately 4%, 6% and 5% of the total consolidated revenues for the years ended December 31, 2016, 2015 and 2014, respectively. Furthermore, we did not audit the financial statements of equity accounted investees, the investment in which as at December 31, 2015 amounted to \$9 million and the Group's share in their profits amounted to \$6 and \$6 million for the years ended December 31, 2015 and 2014, respectively. The financial statements of those companies were audited by other auditors, whose reports thereon were furnished to us, and our opinion, insofar as it relates to amounts emanating from the financial statements of such companies, is based solely on the reports of the other auditors.

We conducted our audit in accordance with generally accepted auditing standards in Israel, including standards prescribed by the Auditors' Regulations (Manner of Auditor's Performance) 1973. Such standards require that we plan and perform the audit to obtain reasonable assurance that the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by the Company's Board of Directors and its management, as well as evaluating the overall financial statement presentation. We believe that our audit and the reports of the other auditors provide a reasonable basis for our opinion.

In our opinion, based on our audit and on the reports of the other auditors, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of the Company and its consolidated subsidiaries as of December 31, 2016 and 2015 and their results of operations, changes in its equity and cash flows for each of the three years ended December 31, 2016, in accordance with International Financial Reporting Standards (IFRS).

Without qualifying our opinion, we refer to Note 1 (b) (i) of the financial statements regarding the Company's deficit in equity and working capital as of December 31, 2016; the operating loss and net loss recorded during the year ended December 31, 2016; the risk of deviation from financial covenants; Management plans to improve financial position and liquidity; the agreements reached with the creditors, for the purpose of rescheduling payments; the amendments to the financial covenants and to Management and the Board of Directors' assessment in respect of the Company's ability to meet its liabilities and to comply with the new set of financial covenants.

# **1 Reporting entity**

(a) ZIM Integrated Shipping Services Ltd. (hereinafter - the "Company" or "Zim") and its subsidiaries (hereinafter - the "Group" or "the Companies") and the Group's interests in associates, operate in the field of container shipping and related services.

Zim is a company incorporated in Israel, with limited liability. The address of the Company's registered office is 9 Andrei Sakharov Street, Haifa, Israel.

# (b) (i) Financial position

The container shipping industry is dynamic and volatile and has been marked in recent years by instability as a result of a prolonged global economic crisis, continued deterioration of market environment which is characterized by slower growth of demand and worsening overcapacity combined with increased uncertainty due to the realigning of global alliances. This situation combined with carriers' ambitions to increase and protect their market share led freight rates to fall sharply in most of the trades, mainly since the second half of 2015. The first half of 2016 continued to be very challenging. Container freight rates hit historical lows across major trades, as new vessel capacity was added, while market demand remained weak. During the second half of 2016, freight rates have increased in certain trades, following a filing for court receivership by one of the top ten companies in the industry.

In view of the aforementioned continued deterioration in the business environment, the volatile bunker prices, and in order to improve the company's results of operations and liquidity position, Management continues to optimize the Company's network rationalizations including establishment of new partnerships, invest in upgrading customer services and constantly strive to create and maintain efficiencies and cost reductions.

However, continuation of this trend could negatively affect the entire industry and also affect the Company's business, financial position, assets value, results of operations, cash flows and compliance with certain financial covenants.

As of December 31, 2016 the Company's total equity amounted to a negative balance of US\$ 101 million (compared to positive balance of US\$ 79 million as of December 31, 2015) and its working capital amounted to a negative balance of US\$ 65 million (compared to positive balance of US\$ 5 million as of December 31, 2015).

During the year ended December 31, 2016, the Company recorded operating loss of US\$ 52 million (compared to operating profit of US\$ 98 million during the year ended December 31, 2015 and operating loss of US\$ 263 million during the year ended December 31, 2014) and net loss of US\$ 164 million (compared to net profit of US\$ 7 million during the year ended December 31, 2015 and net loss of US\$ 198 million during the year ended December 31, 2014).

As at December 31, 2016, the Company complies with its amended financial covenants, the Company's liquidity amounts to US\$ 182 million (Minimum Liquidity required is US\$ 125 million) - see also Note 12(c) to 2015 annual financial statements.

In order to improve its financial position and liquidity, the Company took the following steps:

(a) The Company approached some of its creditors for the purpose of rescheduling payments.

Below are the main components of the agreements reached:

 Deferral of payments in a total amount of US\$ 116 million (the "Deferred Amounts"), during a period of up to 12 months starting on September 30, 2016, each creditor with relation to its specific contracts. The repayment of the Deferred Amounts will begin as from January 1, 2018 on a straight line basis and will end on December 31, 2020 (the "Repayment Period").

# **1** Reporting entity (cont'd)

# (b) (i) Financial position (cont'd)

In case any respective agreement expires before the end of the Repayment Period, the unpaid balance of Deferred Amounts will be paid in full upon expiration.

- 2) The Deferred Amounts bear interest, at an annual rate of Libor + 2.8% paid quarterly in cash.
- 3) The Company granted security over its rights and interests deriving from certain of its receivables, for securing the repayment of the Deferred Amounts (using a similar receivablebacked facility as described in Note 12 (d)). The balance of the secured Deferred Amounts as of December 31, 2016 amounted to US\$ 41 million.
- 4) In case of excess cash, as defined in the rescheduling agreements, a mechanism of mandatory prepayments of the abovementioned rescheduled amounts and their related accrued interest, will apply.

Further to such rescheduling, certain agreements of containers leases previously classified as operational leases were reclassified as financial leases, resulting in recognition of additional assets and liabilities in a total amount of US\$ 73 million.

(b) The Company obtained amendments to its financial covenants (other than the Minimum liquidity covenants, which remains US\$ 125 million) – see Note 12(c).

The Company's financial position, liquidity and the risk of deviation from financial covenants depend on the recovery of the shipping industry and especially the freight rates. Current economic conditions make forecasting difficult, and there is possibility that actual performance may be materially different from Management plans and expectations.

In the opinion of the company's management and its Board of Directors, the updated forecast and the abovementioned actions with regards to rescheduling of payments and covenants amendment, enables the Company to meet its liabilities and operational needs and to comply with the new set of financial covenants for a period of at least 12 months following the balance sheet date.

#### (ii) Financial restructuring (2014)

The Company's debt restructuring, which was completed on July 16, 2014 (hereinafter: "the effective date of the restructuring"), involved representatives of the majority of the Company's financial creditors, related parties and additional stakeholders. As a result of the restructuring, among other things, the Company's outstanding indebtedness and liabilities (face value, including future commitments in respect of operating leases, and with regard to those parties participating in the restructuring) were reduced from approximately US\$ 3.4 billion to approximately US\$ 2 billion.

The main principles of the Company's restructuring agreements are:

- (a) Partly secured creditors (other than those who elected to enter into the VesselCo arrangement detailed in (c) below) received new fully secured loans in an amount equal to an agreed value of the assets securing the current existing debt (hereinafter: "Tranche A"). Tranche A debt bears interest at an annual rate of LIBOR + 2.8% and is to be repaid on the earlier of: (i) seven years from the effective date of the restructuring; or (ii) the contractual date of repayment of the original loan with respect to each secured creditor plus approximately sixteen months and a half. The original security shall continue to serve as a first ranking security to the new loan. In general, if the Company disposes of a secured vessel at any time prior to the applicable maturity date, all Tranche A debt for that vessel is to be repaid (see also (b) below).
- (b) The Company undertook to scrap eight vessels during the period of 16 months from the effective date of the restructuring. Upon the effective date of the restructuring, those vessels were classified as held for sale and as a result, an impairment loss in an amount of US\$ 110 million was recorded under other operating expenses (as included in the Day 1 Effect table below). As of December 31, 2015 all of such vessels were disposed.

# **1 Reporting entity (cont'd)**

# (b) (ii) Financial restructuring (2014) (cont'd)

- (c) Certain vessel loan creditors purchased (directly or indirectly) the vessels secured in their favour and leased them back to the Company at such terms and conditions as agreed in the restructuring agreements (hereinafter: "VesselCo"). Upon the lease back of those vessels, five of the vessels were classified as capital leases and three of the vessels, as operating leases.
- (d) The unsecured portion of the pre-restructuring debt (hereinafter: "the deficiency claim") entitled the creditors to a new unsecured debt: Series C Notes and, for certain creditors, also Series D Notes (hereinafter: "Series C and D Notes") and the Company's equity (other than with respect to the shipyard's loan, see (e) below). Both Series C and D Notes bear interest at an annual rate of 3%, while the Series D Notes entitled to an additional interest at a rate of 2% per year, which shall be payable in kind (PIK interest). The repayment of the Series C Notes are due on June 20, 2023 and the repayment of the Series D Notes are due on June 21, 2023 ("bullet"). In case of excess cash, as defined in the restructuring agreement, a mechanism for mandatory prepayments using excess cash flows will be provided for each of the Series C and Series D Notes. Each of the Series C Notes and the Series D Notes has priority in early repayments resulting from excess cash flow over Tranche A. In addition, the restructuring agreement defines a mechanism of early repayments of proceeds from the sale of assets, if certain conditions are met. The Series C Notes has priority in such early repayments over the Series D Notes.
- (e) With respect to the shipyard's loan the outstanding amount, which was supposed to entitle the creditor to a portion in the allocation of the Company's shares, instead entitled the creditor to an unsecured loan (hereinafter: "Tranche E"). Tranche E bears interest at an annual rate of 2%. In the first nine years of the loan period, 1.75% of the interest rate shall accrue as a PIK interest and after the first nine years until the end of the twelfth year, subject to the full settlement of Tranche A, Series C Notes and Series D Notes, interest shall be payable in cash.
- (f) New reduced charter hire floor rates and rate adjustment mechanisms were agreed with the ship owners, including related parties ship owners. In addition, the ship owners (excluding certain related parties as described in (j) below) also received their position of the Company's Series C and D Notes and the Company's equity. Regarding operational leases, which classification upon the restructuring remained unchanged, deferred expenses in the amount equal to the fair value of Series C and D Notes and equity issued to third party ship owners will be recorded as additional charter hire expenses throughout the remaining charter periods.
- (g) Five leased vessels previously classified as capital leases were reclassified, in light of the change in the lease terms, as operational leases.
- (h) The financial creditors and ship owners received shares aggregating to 68% of the Company's issued share capital (on a fully diluted basis, post-restructuring, after Israel Corporation's (hereinafter "IC") investment in the Company, as set forth in (i) below).
- (i) IC invested an amount of US\$ 200 million in the Company's share capital (US\$ 90 million out of this amount were agreed to serve as a reserve for investments in the business of the Company, under the provisions agreed in the restructuring agreements) and waived and discharged all the Company's liabilities toward it. All of the Company's existing shares and options, including those held by IC, became null and void and IC received shares aggregating to 32% of the Company's issued share capital on a fully-diluted basis. For further details regarding a derivative action in respect of the restructuring approval by IC, see Note 26(c). For further details regarding the transfer of the Company's shares from IC to Kenon, see Note 11(c). With regard to approximately US\$ 12 million (NIS 45 million) deferred debt of the Company to IC in connection with a derivative claim (see Note 26(b)), such waiver will be terminated and the debt will be reinstated if the court determines that the waiver was not valid. In such event the debt will be repaid following the full repayment of the debts under the restructuring (Tranche A, Series C and D Notes and Tranche E). As of December 31, 2016, the remaining balance out of the amount invested by IC was US\$ 40 million.

IC has further agreed to provide a receivable-backed credit line of US\$ 50 million ("IC's credit line obligation") for a period of two years as of the restructuring date. For further details regarding the alternative facility provided by a third party financial institution, see Note 12(d).

# **1** Reporting entity (cont'd)

# (b) (ii) Financial restructuring (2014) (cont'd)

- (j) Certain related parties, which have chartered vessels to the Company, agreed to receive a charter rate which, in general, will be lower by \$1,000 per day than that paid to the ship owners who are not related parties for similar vessels (see also (k) below).Also, certain related parties waived their rights to receive their part of the Series C and D Notes and the Company's equity which are primarily attributable to the reduction of the charter hire (see (f) above), in favour of certain third party creditors.
- (k) According to the Company's accounting policy, transactions with related parties acting in their capacity as controlling shareholders are recorded directly in equity. Accordingly, all debt waivers and benefits from related parties (in an amount of approximately US\$ 237 million, net of the relevant income tax influence) were recorded against capital reserve from transactions with related parties.
- (1) According to the provisions of IAS 39, it was concluded that the terms of all debt participating in the restructuring were substantially modified. Accordingly, the old debt was derecognized and the new debt (Tranche A, Series C Notes, Series D Notes, Tranche E and finance lease liabilities under VesselCo) as well as the new equity were recorded at fair value at the effective date of the restructuring.

The valuation technique which used in order to measure the fair value of the new debt was the discounted cash flows technique. The interest rates used to discount cash flows (between approximately 3% and 10%) were estimated by the Company assisted by an external evaluator based on a synthetic rating calculated using accepted methodology and considering rating-appropriate interest rate curves.

- (m) Under the restructuring all previous covenants were annulled and a new set of financial covenants was agreed.For details of the covenants agreed at the restructuring and their further amendment see Note 12(c).
- (n) Further to the The Company's obligation to have a committed receivable-backed credit facility (as mentioned in Note 1(b)(i) above), during 2015 Tranche A agreements were amended to allow the Company to arrange an alternative credit facility by September 30, 2015 instead of April 15, 2015. For details regarding the credit facility obtained - see Note 12(d).

In addition, the Company committed to certain limitations and restrictions, relating to, among others, dividend distributions and incurrence of debt.

(o) Amendments to the Special State Share were made as set forth in the compromise agreement achieved with the holder of the Special State Share. See also Note 11 (b).

As a result of the above mentioned, presented hereunder is information regarding the effect of the debt restructuring on the Company's 2014 financial statements:

(1) Statements of financial position:

		Total Effect on Day 1 increase (decrease)
		Million US\$
	Total assets	(316)
	Total liabilities	(1,166)
	Total equity	850
(2)	Income statements:	
		Total Effect on Day 1 income (expenses)
		Million US\$
	Results from operating activities	(239)
	Net finance income	186
	Income taxes	41
		(12)

# 2 **Basis of Preparation**

#### (a) Statement of compliance

These Consolidated Financial Statements have been prepared in accordance with International Financial Reporting Standards ("IFRSs") as issued by IASB.

The Financial Statements were approved for issue by the Board of Directors on March 2, 2017.

# (b) Basis of measurement

The Consolidated Financial Statements have been prepared on the historical cost basis except for certain items that are measured as described below in Note 3.

### (c) Use of estimates and judgements

The preparation of Financial Statements in conformity with IFRSs requires management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets, liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

Estimations made by management in the application of IFRSs that have significant effect on the Financial Statements and estimates with a significant risk of material adjustment in the next year are discussed in Note 29.

# (d) Functional and presentation currency

These Consolidated Financial Statements are presented in United States dollars, which is the Company's functional currency. All amounts have been rounded to the nearest thousand, unless otherwise indicated.

# **3** Significant accounting policies

The accounting policies set out below have been applied consistently to all periods presented in these consolidated financial statements, and have been applied consistently by Group entities.

#### (a) Operating cycle

The normal operating cycle of the Company is no longer than one year.

### (b) Basis of consolidation

### (i) **Business combinations**

The Group implements the acquisition method to all business combinations. The acquisition date is the date on which the acquirer obtains control over the acquiree. An investor controls an investee when it is exposed or has rights to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee.

Substantive rights held by the Group and by others are taken into account in assessing control.

The Group recognizes goodwill at acquisition according to the fair value of the consideration transferred including any amounts recognized in respect of non-controlling interests in the acquiree less the net amount of the identifiable assets acquired and the liabilities assumed.

The consideration transferred includes the fair value of the assets transferred to the previous owners of the acquiree, the liabilities incurred by the acquirer to the previous owners of the acquiree.

In a step acquisition, the difference between the acquisition date fair value of the Group's pre-existing equity rights in the acquiree and the carrying amount at that date is recognized in profit or loss under other income or expenses.

Costs associated with business combination such as: finder's fees, advisory, legal, valuation and other professional or consulting fees are expensed in the period the services are received.

#### (ii) Subsidiaries

Subsidiaries are entities controlled by the Group. The financial statements of subsidiaries are included in the consolidated financial statements from the date that control commences until the date that control ceases. The accounting policies of subsidiaries have been changed when necessary to align them with the policies adopted by the Group.

#### (iii) Non-controlling interests

Non-controlling interests comprise the equity of a subsidiary that cannot be attributed, directly or indirectly, to the parent company.

#### Measurement of non-controlling interests on the date of the business combination

Non-controlling interests that are instruments that give rise to a present ownership interest and entitle the holder to a share of net assets in the event of liquidation (for example: ordinary shares), are measured at the date of the business combination at either fair value or their proportionate interest in the identifiable assets and liabilities of the acquiree, on a transaction-by-transaction basis.

Allocation of profit or loss and other comprehensive income to the shareholders

Profit or loss and any part of other comprehensive income are allocated to the owners of the Company and the non-controlling interests, even when the result is a negative balance of the non-controlling interests.

#### Loss of control

Upon the loss of control, the Group derecognizes the assets and liabilities of the subsidiary, any non-controlling interests and the other components of equity related to the subsidiary. If the Group retains any interest in the previous subsidiary, then such interest is measured at fair value at the date that control is lost. The difference between the sum of the proceeds and fair value of the retained interest, and the derecognized balances is recognized in profit or loss under other income or other expenses. Subsequently the retained interest is accounted for as an equity-accounted investee or as an available-for-sale asset depending on the level of influence retained by the Group in the relevant company.

# **3** Significant accounting policies (cont'd)

#### (b) Basis of consolidation (cont'd)

#### (iv) Investment in associates

Associates are those entities in which the Group has significant influence, but not control or joint control, over the financial and operating policies. Significant influence is presumed to exist when the Group holds between 20% and 50% of another entity. In assessing significant influence, potential voting rights that are currently exercisable or convertible into shares of the investee are taken into account.

Associates are accounted for using the equity method (equity accounted investees) and are recognized initially at cost. The cost of the investment includes transaction costs. The consolidated financial statements include the Company's share of the income and expenses in profit or loss and of other comprehensive income of equity accounted investees, after adjustments to align the accounting policies with those of the Company, from the date that significant influence commences until the date that significant influence ceases.

When the Company's share of losses exceeds its interest in an equity accounted investee, the carrying amount of that interest, including any long-term interests that form part thereof, is reduced to zero. When the Company's share of long-term interests that form a part of the investment in the investee is different from its share in the investee's equity, the Group continues to recognize its share of the investee's losses, after the equity investment was reduced to zero, according to its economic interest in the long-term interests, after the aforesaid interests were reduced to zero. The recognition of further losses is discontinued except to the extent that the Group has an obligation to support the investee or has made payments on behalf of the investee.

#### (v) Change in interest held in associated companies while retaining significant influence

When the Group increases its interest in an associated Group accounted for by the equity method while retaining significant influence, it implements the acquisition method only with respect to the additional interest obtained whereas the previous interest remains the same. When there is a decrease in the interest in an associated Group accounted for by the equity method while retaining significant influence, the Group derecognizes a proportionate part of its investment and recognizes in profit or loss a gain or loss from the sale.

# (vi) Loss of significant influence

The application of the equity method is discontinued from the date the group loses significant influence in an associate and it accounts for the retained investment as a financial asset or subsidiary, as relevant. On the date of losing significant influence, any retained interest it has in the former associate is measured at fair value. Any difference between the sum of the fair value of the retained interest and any proceeds received from the partial disposal of the investment in the associate or joint venture, and the carrying amount of the investment on that date, are recognized in profit or loss. Amounts recognized in equity through other comprehensive income with respect to such associates are reclassified to profit or loss or to retained earnings in the same manner that would have been applicable if the associate had itself disposed the related assets or liabilities.

# (vii) Transactions eliminated on consolidation

Intra-group balances and transactions, and any unrealised income and expenses arising from intra-group transactions, are eliminated in preparing the Financial Statements. Unrealised gains arising from transactions with associates are eliminated to the extent of the Group's interest in the associate. Unrealised losses are eliminated in the same way as unrealised gains, but only to the extent that there is no evidence of impairment.

# **3** Significant accounting policies (cont'd)

#### (c) Foreign currency

#### (i) Foreign currency transactions

Transactions in foreign currencies are translated to the respective functional currency of Group entities at exchange rates at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies at the balance sheet date are translated to the functional currency at the exchange rate at that date. The foreign currency gain or loss on monetary items is the difference between amortised cost in the functional currency at the beginning of the period, adjusted for effective interest and payments during the period, and the amortised cost in foreign currency translated at the exchange rate at the end of the period. Non-monetary assets and liabilities denominated in foreign currencies that are measured at fair value are translated to the functional currency at the exchange rate at the date that the fair value was determined. Foreign currency differences arising on retranslation are recognised in profit or loss.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rate at the date of the transaction.

#### (ii) Foreign operations

The assets and liabilities of foreign operations, including goodwill and fair value adjustments arising on acquisition, are translated into United States dollars at exchange rates at the balance sheet date. The income and expenses of foreign operations are translated to United States dollars at exchange rates at the dates of the transactions.

Foreign currency differences are recognized in other comprehensive income, and presented in the foreign currency translation reserve (translation reserve) in equity. However, if the operation is a non-wholly-owned subsidiary, then the relevant proportionate share of the translation difference is allocated to the non-controlling interests.

#### (d) **Financial instruments**

#### (i) Non-derivative financial assets

#### Initial recognition of financial assets

The Group initially recognizes loans and receivables and deposits on the date that they are originated. All other financial assets acquired in a regular way purchase, are recognized initially on the trade date which is the date that the Group becomes a party to the contractual provisions of the instrument, meaning on the date the Group undertook to purchase or sell the asset. Non-derivative financial instruments comprise investments in equity and debt securities, trade and other receivables and cash and cash equivalents.

#### Derecognition of financial assets

The Group derecognizes a financial asset when the contractual rights of the Group to the cash flows from the asset expire or the Group transfers the rights to receive the contractual cash flows from the financial asset in a transaction in which substantially all the risks and rewards of ownership of the financial asset are transferred.

The Group classifies its financial assets according to the following categories:

#### Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. Such assets are recognized initially at fair value plus any directly attributable transaction costs. Subsequent to initial recognition loans and receivables are measured at amortized cost using the effective interest method, less any impairment losses.

See paragraph (ii) below regarding the offset of financial assets and financial liabilities.

#### Cash and cash equivalents

Cash and cash equivalents include cash balances available for immediate use and call deposits. Cash equivalents include short-term highly liquid investments (with original maturities of three months or less) that are readily convertible into known amounts of cash and are exposed to insignificant risks of change in value. Bank overdrafts that are repayable on demand and form an integral part of the Group's cash management are included as a component of cash and cash equivalents for the purpose of the statement of cash flows.

# **3** Significant accounting policies (cont'd)

#### (d) Financial instruments (cont'd)

#### Available-for-sale financial assets

The Group's investments in certain equity instruments are classified as available-for-sale financial assets. Available-for-sale financial assets are recognized initially at fair value plus any directly attributable transaction costs. Subsequent to initial recognition, they are measured at fair value and changes therein, other than impairment losses, foreign currency differences and the accrual of effective interest on available-for-sale debt instruments, are recognized directly in other comprehensive income and presented within equity in a reserve for financial assets classified as available-for-sale. A dividend received in respect of available-for-sale financial assets is recognized in profit or loss on the date the entity's right to receive the dividend is established. When an investment is derecognized, the cumulative gain or loss in the reserve for available-for-sale financial assets is transferred to profit or loss.

#### (ii) Non-derivative financial liabilities (cont'd)

The Group initially recognizes debt securities issued on the date that they are originated. All other financial liabilities are recognized initially on the trade date at which the Group becomes a party to the contractual provisions of the instrument.

Financial liabilities are derecognized when the obligation of the Group, as specified in the agreement, expires or when it is discharged or cancelled.

Financial liabilities are recognized initially at fair value plus any directly attributable transaction costs. Subsequent to initial recognition these financial liabilities are measured at amortized cost using the effective interest method.

(a) Debt modifications

An exchange of debt instruments having substantially different terms, between an existing borrower and lender is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability at fair value. The difference between the carrying amount of the original financial liability and the fair value of the new financial liability is recognized in profit or loss as part of the financial income or expenses.

Any costs incurred in relation to such modifications are recognized in profit or loss as part of the financial income or expenses.

The terms are substantially different if the discounted present value of the cash flows according to the new terms, including any commissions paid, less any commissions received and discounted using the original effective interest rate, is different by at least ten percent from the discounted present value of the remaining cash flows of the original financial liability.

In addition to the aforesaid quantitative criterion, the Group examines, inter alia, whether there have also been changes in various economic parameters inherent in the exchanged debt instruments.

(b) Debt for equity swap transaction

Equity instruments issued to extinguish all or part of a financial liability are "consideration paid", for the purpose of calculating the gain or loss from the extinguishment of the financial liability. Equity instruments shall be initially measured at fair value, unless fair value cannot be reliably measured, in which case the issued instruments will be measured at the fair value of the financial liability extinguished. Any difference between the amortized cost of the financial liability and the initial measurement amount of the equity instruments issued shall be recognized in profit or loss as part of the financial income or expenses.

The Group has the following non-derivative financial liabilities: loans and borrowings from banks and others, financial lease, debentures and trade and other payables.

#### Offset of financial instruments

Financial assets and liabilities are offset and the net amount presented in the statement of financial position when, and only when, the Group currently has a legal right to offset the amounts and intends either to settle on a net basis or to realize the asset and settle the liability simultaneously.

# **3** Significant accounting policies (cont'd)

# (d) Financial instruments (cont'd)

#### (iii) Derivative financial instruments (economic hedges)

Derivatives are recognized initially at fair value; attributable transaction costs are recognized in profit or loss as incurred. Subsequent to initial recognition, derivatives are measured at fair value, and changes therein are recognised in profit or loss as part of "finance income / expenses" (regarding interest rate derivatives) and operating expenses (regarding fuel derivatives).

#### (iv) Financial guarantees

A financial guarantee is initially recognized at fair value. In subsequent periods a financial guarantee is measured at the higher of the amount recognized in accordance with the guidelines of IAS 37 and the liability initially recognized after being amortized in accordance with IAS 18. Any resulting adjustment of the liability is recognized in profit or loss.

#### (v) Share capital

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of ordinary shares are recognised as a deduction from equity, net of any tax effects.

#### (e) Vessels, containers, handling equipment and other tangible assets

#### (i) **Owned assets**

Vessels, containers, handling equipment and other tangible assets are stated at cost less accumulated depreciation (see paragraph (iv) below) and accumulated impairment losses (see Note 3 (g)). The cost of inspecting the vessel (dry docking), that needs to be performed after a number of years of operation (usually once every five years), is separated from the cost of the vessel and depreciated according to the period until the following inspection. The management of the Company believes that, in a whole vessel, there is no other material separate component whose contractual period of use is different from the contractual period of use of the whole vessel (25-30 years).

Gains and losses on disposal of vessels, containers, handling equipment and other tangible assets are determined by the difference between the net consideration from disposal and the carrying amount of these items, and are recognised net within "other operating income/ expenses" in profit or loss.

#### (ii) Leased assets

If the terms of a lease in which the Group is a lessee are modified, the Company assesses whether the revised terms would have resulted in different classification of the lease had they been in effect at inception. Inter alia, the Company assesses whether the net present value of the minimum lease payments of the lease amounts to substantially all of the fair value of the leased asset by comparing the fair value of the leased asset at inception to the present value of the lease payments for that date, considering the previous terms until the modification and the revised terms from the modification date onwards, discounted using the rate implicit in the original lease.

If a lease previously accounted for as a finance lease is reclassified as an operating lease, the Group derecognizes the leased asset and the finance lease liability and recognizes the profit (loss) from derecognizing the leased asset (calculated as the difference between the fair value of the leased asset and its carrying amount) in other operating income (expenses) and the profit (loss) from derecognizing the liability (calculated as the difference between (1) the fair value of the leased asset and the fair value of any liabilities incurred and instruments issued as part of the modification and (2) the carrying amount of the liability) in finance income (expense).

If a lease previously accounted for as an operational lease, is reclassified as a financial lease, the group recognize a leased asset and a finance lease liability at an amount equal to the lower of its fair value and the present value of the minimum lease payments.

If a lease previously accounted for as a finance lease is not reclassified as a result of the modification, the modification is accounted for as a debt modification.

If a lease previously accounted for as an operating lease is not reclassified as a result of the modification, the revised lease payments, including any liabilities incurred and instruments issued as part of the modification, are expensed on a straight line basis throughout the remaining lease term.

# **3** Significant accounting policies (cont'd)

#### (e) Vessels, containers, handling equipment and other tangible assets (cont'd)

#### (iii) Subsequent costs

The Group recognises in the carrying amount of an item of vessels, containers, handling equipment and other tangible assets the cost of replacing part of such an item when that cost is incurred if it is probable that the future economic benefits embodied with the item will flow to the Group and the cost of the item can be measured reliably. The cost of the replaced part is derecognized. All other costs are recognised in the income statement as an expense as incurred.

Material improvements that increase the useful life of the assets are capitalised as part of their cost.

#### (iv) Depreciation

Depreciation is a systematic allocation of the depreciable amount of an asset over its useful life. The depreciable amount is the cost of the asset, or other amount substituted for cost, less its residual value.

An asset is depreciated from the date it is ready for use, meaning the date it reaches the location and condition required for it to operate in the manner intended by management.

Depreciation is recognised in profit and loss on a straight-line basis over the estimated useful lives of each part of an item of vessels, containers, handling equipment and other tangible assets. Freehold land is not depreciated.

Leased assets, including leasehold improvements, are depreciated over the shorter of the lease term and their useful lives unless it is reasonably certain that the Group will obtain ownership by the end of the lease term.

The estimated useful lives of vessels, containers, handling equipment and other tangible assets for the current and comparative periods are as follows (taking into account a residual value of mainly 10% of the cost of the assets, where applicable):

		years
1.	Vessels	25-30
2.	Containers	13
3.	Chassis	30
4.	Other equipment	13
5.	Dry docking for owned vessels	Up to 5

The estimated useful lives of other tangible assets for the current and comparative periods are as follows:

		years	
1.	Buildings	25	
2.	Computer systems and communication equipment	4-7	(mostly 5 years)
3.	Other	5-15	

Depreciation methods, useful life and residual values are reviewed at each balance sheet date.

# Intangible assets

**(f)** 

#### (i) Goodwill

Goodwill that arises upon the acquisition of subsidiaries is presented as part of intangible assets.

Subsequently to its' initial recognition, goodwill is measured at cost less accumulated impairment losses.

#### (ii) Research and development of software

Development activities involve a plan or design for the production of new or substantially improved processes. Development expenditure is capitalised only if development costs can be measured reliably, the product or process is technically and commercially feasible, future economic benefits are probable, and the Group intends to and has sufficient resources to complete development and to use the asset. The expenditure capitalised includes the cost of direct labour and overhead costs that are directly attributable to preparing the asset for its intended use. Other development expenditure is recognised in profit or loss as incurred.

# **3** Significant Accounting Policies (cont'd)

#### (f) Intangible assets (cont'd)

#### (ii) Research and development of software (cont'd)

In subsequent periods capitalised development expenditure is measured at cost less accumulated amortisation and accumulated impairment losses.

#### (iii) Software

The Group's assets include computer systems consisting of hardware and software. The licenses for the software, which are considered to be a separate item and add functionality to the hardware, are classified as intangible assets.

#### (iv) Dry docking for chartered vessels

The cost of inspecting the fleet of vessels held under bareboat charter (an operating lease) is amortised according to the period until the following inspection or the period until the end of the charter, if shorter.

#### (v) Subsequent expenditure

Subsequent expenditure is capitalised only when it increases the future economic benefits embodied in the specific asset to which it relates. All other expenditure, including expenditure on internally generated goodwill and brands, is recognised in profit or loss as incurred.

# (vi) Amortisation

Amortization is a systematic allocation of the amortizable amount of an intangible asset over its useful life. The amortizable amount is the cost of the asset, or other amount substituted for cost, less its residual value.

Amortisation is recognised in profit or loss on a straight-line basis over the estimated useful lives of intangible assets, other than goodwill, from the date that they are available for use. The estimated useful lives for the current and comparative periods are as follows:

Software	5 years
Dry docking for chartered vessels	Up to 5 years
Capitalised software development costs	5-8 years

Depreciation methods, useful life and residual values are reviewed at each balance sheet date.

# (g) Impairment

#### (i) Financial assets

A financial asset not carried at fair value through profit or loss is tested for impairment when objective evidence indicates that a loss event has occurred after the initial recognition of the asset, and that the loss event had a negative effect on the estimated future cash flows of that asset that can be estimated reliably.

An impairment loss in respect of a financial asset measured at amortised cost is calculated as the difference between its carrying amount, and the present value of the estimated future cash flows discounted at the original effective interest rate. All impairment losses are recognised in profit or loss.

An impairment loss is reversed if the reversal can be related objectively to an event occurring after the impairment loss was recognised. For financial assets measured at amortised cost the reversal is recognised in profit or loss.

#### (ii) Non-financial assets

For the purpose of impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or groups of assets (hereinafter: "CGU"),. For this purpose, the Company, which is one cash generating unit estimates its recoverable amount on the basis of its fair value less costs to sell, using the discounted cash flow (DCF) method.

The recoverable amount of an asset or cash-generating unit is the greater of its value in use and its fair value less costs to sell.

# **3** Significant Accounting Policies (cont'd)

#### (g) Impairment (cont'd)

#### (ii) Non-financial assets (cont'd)

An impairment loss is recognised if the carrying amount of the Company's assets or its cashgenerating unit exceeds its estimated recoverable amount. Impairment losses are recognised in profit or loss. Impairment losses are allocated first to reduce the carrying amount of any goodwill allocated to the units and then to reduce the carrying amount of the other assets in the unit on a pro rata basis.

An impairment loss is allocated between the owners of the Company and the non-controlling interests on the same basis that the profit or loss is allocated.

An impairment loss in respect of goodwill is not reversed. In respect of other assets, impairment losses recognised in prior periods are assessed at each balance sheet date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

#### (h) Employee benefits

#### (i) **Post-employment benefits**

The Group has a number of post-employment benefit plans. The plans are usually financed by deposits with insurance companies or with funds managed by a trustee, and they are classified as defined contribution plans and as defined benefit plans.

# (i) Defined contribution plans

A defined contribution pension plan is a post-employment benefit plan under which an entity pays fixed contributions into a separate entity and will have no legal or constructive obligation to pay further amounts. Obligations for contributions to defined contribution pension plans are recognised as an employee benefit expense in profit or loss in the periods during which related services are rendered by employees.

#### (ii) Defined benefit plans

A defined benefit plan is a post-employment benefit plan other than a defined contribution plan.

The Group's net obligation in respect of defined benefit pension plans is calculated separately for each plan by estimating the amount of future benefit that employees have earned in return for their service in the current and prior periods. That benefit is discounted to determine its present value, and the fair value of any plan assets is deducted.

The Group determines the net interest expense (income) on the net defined benefit liability (asset) for the period by applying the discount rate used to measure the defined benefit obligation at the beginning of the annual period to the then-net defined benefit liability (assets). The discount rate is the yield at the balance sheet date on high grade corporate bonds denominated in the same currency, that have maturity dates approximating the terms of the Group's obligations. The calculation is performed by a qualified actuary using the projected unit credit method.

When the calculation results in a net asset for the Group, an asset is recognized up to the net present value of economic benefits available in the form of a refund from the plan or a reduction in future contributions to the plan. An economic benefit in the form of refunds or reductions in future contributions is considered available when it can be realized over the life of the plan or after settlement of the obligation.

Gains or losses resulting from settlements of a defined benefit plan are recognized in profit or loss. Such gains or losses include any resulting change in the present value of the obligation; any resulting change in the fair value of plan assets and any unrecognized actuarial gains and losses and past service cost.

The Group recognizes immediately, directly in other comprehensive income, all actuarial gains and losses arising from defined benefit plans.

# **3** Significant Accounting Policies (cont'd)

#### (h) Employee benefits (cont'd)

#### (ii) Termination benefits

Termination benefits are recognized as an expense when the Group is committed demonstrably, without realistic possibility of withdrawal, to a formal detailed plan to terminate employment before the normal retirement date, or to provide termination benefits as a result of an offer made to encourage voluntary redundancy. Termination benefits for voluntary redundancies are recognized as an expense if the Group has made an offer of voluntary redundancy, it is probable that the offer will be accepted, and the number of acceptances can be estimated reliably. If benefits are payable more than 12 months after the reporting period, then they are discounted to their present value. The discount rate is the yield at the balance sheet date on high grade corporate bonds denominated in the same currency, that have maturity dates approximating the terms of the Group's obligations.

#### (iii) Other long-term benefits

The Group's net obligation in respect of long-term service benefits, other than pension plans, is the amount of future benefit that employees have earned in return for their service in the current and prior periods; that benefit is discounted to determine its present value, and the fair value of any related assets is deducted. The discount rate is the yield at the balance sheet date on long-term high grade corporate bonds that have maturity dates approximating to the terms of the Group's obligations. The calculation is performed using the projected unit credit method. Any actuarial gains or losses are recognised in profit or loss in the period in which they arise.

#### (iv) Short-term benefits

Short-term employee benefit obligations are measured on an undiscounted basis and are expensed as the related service is provided. The employee benefits are classified, for measurement purposes, as short-term benefits or as other long-term benefits depending on when the Group expects the benefits to be wholly settled.

#### (i) **Provisions**

A provision is recognized if, as a result of a past event, the Group has a present legal or constructive obligation that can be estimated reliably, and it is more likely than not that an outflow of economic benefits will be required to settle the obligation.

The Group recognizes a reimbursement asset if, and only if, it is virtually certain that the reimbursement will be received if the Company settles the obligation. The amount recognized in respect of the reimbursement does not exceed the amount of the provision.

#### Legal claims

The Financial Statements includes appropriate provisions in respect of claims against the Group which, in the opinion of the Group's management based, among others, on the opinion of its legal advisers retained in respect of those claims, is more likely than not that an outflow of economic benefits will be required to settle the obligation and the amount of obligation can be estimated reliably.

Note 26 contains details of the additional exposure due to contingent claims where the amounts are significant, and where the likelihood of realisation is not more likely than not.

#### (j) Revenue Recognition from shipping services and related expenses

Revenue from cargo traffic is recognized in profit or loss in proportion to the stage of completion of the transaction at the balance sheet date. The stage of completion is assessed for each cargo by the reference to the time-based proportion.

The operating expenses related to cargo traffic are recognized immediately as incurred.

If the incremental expenses related to the cargo exceed the related revenue, the loss is recognized immediately in income statement.

#### (k) Lease payments

#### (i) **Operating lease payments**

Payments made under operating leases are recognised in profit and loss on a straight-line basis over the term of the lease. Lease incentives received are recognised as an integral part of the total lease expense, over the term of the lease.

#### (ii) Finance lease payments

Minimum lease payments are apportioned between the finance expense and the reduction of the outstanding liability. The finance expense is allocated to each period during the lease term so as to produce a constant periodic rate of interest on the remaining balance of the liability.

# **3** Significant accounting policies (cont'd)

#### (l) Finance income and expenses

Finance income comprises mainly changes in the fair value of financial assets at fair value through profit or loss. Interest income is recognised as it accrues in profit or loss, using the effective interest method.

Finance expenses comprise mainly interest expense on borrowings, changes in the fair value of financial assets at fair value through profit or loss and impairment losses recognised on financial assets and restructuring expenses. Borrowing costs are expensed in profit or loss in the period in which they are incurred.

In the statements of cash flows, interest received and dividends received are presented as part of cash flows from operating activities. Interest paid and dividends paid are presented as part of cash flows from financing activities.

Foreign currency gains and losses are reported on a net basis.

#### (m) Income tax

Income tax comprises current and deferred tax. Current tax and deferred tax are recognised in profit or loss except to the extent that it relates to items recognised directly in equity or in other comprehensive income.

Current tax is the contractual tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at the balance sheet date, and any adjustment to tax payable in respect of previous years.

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is not recognised for the following temporary differences: the initial recognition of goodwill and the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit, and differences relating to investments in subsidiaries, associates and joint arrangements to the extent that it is probable that they will not reverse in the foreseeable future. Deferred tax is measured at the tax rates that are expected to be applied to the temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the balance sheet date.

A deferred tax asset is recognised only to the extent that it is probable that future taxable profits will be available against which the asset can be utilised. Deferred tax assets are reviewed at each balance sheet date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

Additional income taxes that arise from the distribution of dividends are recognised when the liability to pay the related dividends is recognised.

Current tax balances and deferred tax balances, and movements therein, are presented separately from each other and are not offset. Current tax assets are offset against current tax liabilities, and deferred tax assets against deferred tax liabilities if, the Company or the Group has the legally enforceable right to set off current tax assets against current tax liabilities and the following additional conditions are met:

- In the case of current tax assets and liabilities, the Company or the Group intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously; or
- In the case of deferred tax assets and liabilities, if they relate to income taxes levied by the same taxation authority on either:
  - The same taxable entity; or
  - Different taxable entities, which, in each future period in which significant amounts of deferred tax liabilities or assets are contractual to be settled or recovered, intend to realise the current tax assets and settle the current tax liabilities on a net basis or realise and settle simultaneously.

#### (n) Transactions with controlling shareholder

Assets and liabilities included in a transaction with a controlling shareholder are measured at fair value on the date of the transaction. As the transaction is on the equity level, the Company recorded the difference between the fair value and the consideration from the transaction in its equity.

# Significant accounting policies (cont'd)

#### (o) Government grants

Grants received from the Government of Israel with respect to the cost of employing Israeli resident sailors on Israeli vessels are deducted from the salary costs.

#### (p) Inventories

3

Inventories are measured at the lower of cost and net realizable value. The cost of inventories is based on the moving average principle, and mainly includes fuel on board.

#### (q) Non-current assets and disposal groups held for sale

Non-current assets are classified as held for sale if it is highly probable that they will be recovered primarily through a sale transaction and not through continuing use.

Immediately before classification as held for sale, the assets are remeasured in accordance with the Group's accounting policies. Thereafter, the assets are measured at the lower of their carrying amount and fair value less cost to sell.

Impairment losses recognized on initial classification as held for sale, and subsequent gains or losses on remeasurement, are recognized in profit or loss.

In subsequent periods, depreciable assets classified as held for sale are not periodically depreciated.

### (r) New standards and interpretations not yet adopted

# (i) IFRS 9 (2014), Financial Instruments

A final version of the standard, which includes revised guidance on the classification and measurement of financial instruments and a new model for measuring impairment of financial assets. IFRS 9 (2014) is effective for annual periods beginning on or after January 1, 2018 with early adoption being permitted. The Company is examining the effects of IFRS 9 (2014) on the financial statements.

# (ii) IFRS 15, Revenue from Contracts with Customers

IFRS 15 replaces the current guidance regarding recognition of revenues and presents a new model for recognizing revenue from contracts with customers. IFRS 15 is applicable for annual periods beginning on or after January 1, 2018 and earlier application is permitted. The Company is examining the effects of IFRS 15 on the financial statements.

#### (iii) IFRS 16, Leases

IFRS 16 replaces IAS 17 and its related interpretations regarding leasing arrangements. IFRS 16 will become effective for annual periods as of January 1, 2019, with the possibility of early adoption. The Company is examining the effects of IFRS 16 on the financial statements.

# 4 Determination of fair values

A number of the Group's accounting policies and disclosures require the determination of fair value, for both financial and non-financial assets and liabilities. Fair values have been determined for measurement and/or disclosure purposes based on the following methods. When applicable, further information about the assumptions made in determining fair values is disclosed in the notes specific to that asset or liability.

#### (a) Non-derivative financial liabilities See Note 28(d)(1).

- (b) Trade and other receivables The fair value of trade and other receivables is estimated as the present value of future cash flows. Trade and other receivables are measured at the original invoice amount if the effect of discounting is immaterial.
- (c) Cash Generating Unit for impairment testing See Note 5.

# (d) Assets classified as held for sale

The fair value of assets classified as held for sale is estimated as the expected sale price less costs to sell. The sale price of vessels is calculated based on the estimated iron prices and the vessels weight.

# 4 Determination of fair values (cont'd)

(e) **Derivatives** See Note 28.

#### (f) Financial assets classified as available for sale

The fair value of financial assets classified as available for sale is measured based on their quoted prices on an active market.

## 5 Vessels, containers, handling equipment and other tangible assets (cont'd)

#### Impairment test

Further to the recent trends in the shipping industry as discussed in note 1(b)(i), the Company tested its assets for impairment (mainly its fixed and intangible assets), as of June 30, 2016. For the purpose of IAS 36, the Company, which operates an integrated liner network, has one cash-generating unit (hereinafter: CGU), which consists of all of the Company's operating assets. The Company estimated its recoverable amount on the basis of its fair value less costs to sell, using the discounted cash flow (DCF) method. This measurement is a level 3 fair value measurement under IFRS 13.

The Company's assumptions were made for the period ended on December 31, 2020 and a representative year intended to reflect a long-term, steady state. The key assumptions are set forth below:

- A detailed cash flow for the abovementioned period, based upon the Company's business plan.
- Bunker price: according to the future price curve of fuel.
- Freight rates: a compound annual growth rate of 1.4% over the projection period.
- Increase in aggregate TEU shipped: a compound annual growth rate of 3.0% over the projection period, which is in line with the expected trends in the trades the company is planning to focus on.
- Charter hire rates: contractual rates in effect as of June 30, 2016, and assuming anticipated market rates for renewals of charters expiring in the projection period.
- Discount rate of 9.5%.
- Long-term nominal growth rate of 1.5%, which is consistent with the expected industry average.
- Capital expenditures that are less than or equal to the Company's expected vessel depreciation;
- Payment of tax at the Company's corporate tax rate of 25%; also assumes expected use of tax losses.

The impairment test resulted with a recoverable amount exceeding the carrying amount of the CGU, by an amount ranging between approximately US\$ 291 million and US\$ 330 million. Therefore, no impairment was recognized in the financial statements in respect of the CGU.

Although the Company believes the assumptions used to evaluate the potential impairment of its assets are reasonable and appropriate, such assumptions are highly subjective.

There can be no assurance as to how long bunker prices and freight rates will remain at their current levels or whether they will increase or decrease by any significant degree. Freight rates may remain at depressed levels for some time, which could adversely affect the Company's revenue and profitability.

Change by 100 bps in the following assumptions will result in an increase (decrease) in the fair value of the recoverable amount as follows:

	Increase	Decrease
	By 1	00 bps
	US\$	million
Discount rate	(130)	164
Terminal growth rate	106	(83)

# 5 Vessels, containers, handling equipment and other tangible assets (cont'd)

#### Vessels held for sale

Upon the 2014 restructuring, the Company undertook to scrap eight vessels as described in Note 1(b)(ii)(b).

In addition, during the year ended December 31, 2014, two of the Company's vessels were classified as held for sale due to the Company's decision to sell them for the purpose of demolition.

Accordingly, during the year ended December 31, 2014 and 2015 the Company recorded an impairment in an amount of US\$ 17 million and US\$ 7 million, respectively under other operating expenses. As at December 31, 2015 all the vessels classified as held for sale were disposed.

### (a) Vessels and equipment leased under finance leases (Note 3(e)(ii)):

	2016	2015
	US\$	000
Cost	1,335,896	1,233,482
Accumulated depreciation	(483,248)	(427,680)
Net carrying amount	852,648	805,802

- (b) For details of secured tangible assets, see Note 12 (a).
- (c) Most of the carrying amount of lands and buildings held for own use, are freehold land and buildings which are located outside of Israel.

# 7 Investments in associates

During 2015, the Company sold all of its holdings in an associated company. The capital gain in an amount of US\$ 32.0 million was recorded in other operating income. Following such sale, and in accordance with the restructuring agreements, as described in note 1(b)(ii)(d) above, the company declared a partial prepayment of tranche C in the amount of US\$ 11.8 million, paid in December 2015. In addition, a long-term loan previously granted to the above mentioned associated company was repaid in an amount of US\$ 27.2 million.

During 2016, the Company sold a portion of its holdings in an associated company and ceased to have significant influence over such investee. In accordance with IAS 28, the company recognized a capital gain in an amount of US\$ 15.7 million recorded in other operating income, reflecting the difference between the fair value of the retained investment and the proceeds from the portion sold and the carrying amount of the investment. Following such sale, the Company accounts for its retained investment as an available for sale financial asset, in accordance with IAS 39.

The Group's exposure to interest rate risk and a sensitivity analysis for financial assets and liabilities is disclosed in Note 28.

# **11** Capital and reserves

# (a) Share capital

	2016	2015
Number of ordinary shares (issued and paid up):		
Balance at the beginning of the year	10,000,000	10,000,000
Balance at the end of the year	10,000,000	10,000,000
Ordinary shares - in US\$'000's	88	88
- in NIS'000's	300	300

On December 31, 2016 and 2015 the authorised share capital comprised 350,000,001 ordinary shares. The shares have a par value of NIS 0.03.

The holders of ordinary shares are entitled to receive dividends when declared and are entitled to one vote per share at meetings of the Company. All shares rank equally with regard to the Company's residual assets, except as disclosed in (b) below.

# (b) Special State Share

The issued and paid-up share capital includes one share which is a Special State Share.

In the framework of the process of privatising the Company, all the State of Israel's holdings in the Company (about 48.6%) were acquired by The Israel Corporation pursuant to an agreement from February 5, 2004. As part of the process, the Company allotted to the State of Israel a Special State Share so that it could protect the vital interests of the State.

On July 14, 2014 the State and the Company have reached a settlement agreement (the "Settlement Agreement") that has been validated as a judgment by the Supreme Court. The Settlement Agreement provides, inter alia, the following arrangement shall apply: State's consent is required to any transfer of the shares in the Company which confers on the holder a holding of 35% and more of the Company's share capital. In addition, any transfer of shares which confers on the holders a holding exceed 24% but not exceed 35%, shall require a prior notice to the State. To the extent the State determines that the transfer involves a potential damage to the State's security or any of its vital interests or if the State did not receive the relevant information in order to formulate a decision regarding the transfer, the State shall be entitled to inform, within 30 days, that it objects to the transfer, and it will be required to reason its objection. In such an event, the transferor shall be entitled to approach a competent court on this matter.

The Special State Share is non-transferable; its rights are described in the new Company's Articles of Association.

Except for the rights attached to the said share, it does not confer upon its holder voting rights or any share capital related rights.

(c) On January 7, 2015, the board of directors of IC declared a pro rata dividend of the outstanding shares of Kenon, a former subsidiary of IC, which resulted in the legal and structural separation of the two companies. On January 9, 2015 IC transferred all of the company's shares it received in connection with the 2014 Restructuring, to Kenon.

# 12 Loans and other liabilities

This Note provides information about the contractual terms of the Group's interest-bearing loans and borrowings. For more information about the Group's exposure to interest rate, foreign currency and liquidity risk, see Note 28.

# (a) The loans and other liabilities are as follows:

	2016	2015
	US\$'000	
Non-current liabilities		
Loans from financial institutions	79,408	96,014
Loans from shipyards	38,012	35,124

	160,707	228,986

#### Liens placed in respect of liabilities

As security for part of the short and long term bank credit and the other long-term loans and liabilities, which were established, inter alia, in order to finance the purchase of vessels (see Note 5) and as security for bank guarantees, liens have been registered on most of the vessels fleet and its equipment, including the revenues generated by the vessels and the insurance rights relating to the vessels, containers, handling equipment, deposits and other assets. The aggregate carrying values of the assets secured are as follows:

	2016	2015	
	US \$'000		
Vessels	748,228	782,481	
Containers and handling equipment	339,884	277,680	
Deposits	1,102	56,721	
Land and buildings	5,956	8,119	
	1,095,170	1,125,001	

# 12 Loans and other liabilities (cont'd)

# (b) Terms and debt repayment schedule

Regarding the main principles and conditions of the Company's restructured debt see Note 1(b)(ii).

Terms and conditions of outstanding loans are as follows:

	December 31, 2016				
			Year of		Carrying
	Currency	Effective interest (5)	Maturity	Face value	Amount (6)
				US \$'000	
Debentures :					
Tranche A (1)	US\$	Libor + 2.8%	2021	37,136	37,136

Short-term credit from banks	US\$	1.38%-2.7%	2016	114,061	114,061
				1,498,290	1,376,359

(1) See Note 1(b)(ii)(a).

- (2) See Note 1(b)(ii)(d).
- (3) See Note 1(b)(ii)(e).
- (4) Mainly liabilities which are not bearing any interest.
- (5) The effective interest rate is the rate that discounts estimated future cash payments or receipts through the contractual life of the financial instrument to the net carrying amount of the financial liability, and it does not necessarily reflect the contractual interest rate.
- (6) Regarding the carrying amount of the assets secured against the Company's loans and liabilities see Note 12(a).

# 12 Loans and other liabilities (cont'd)

#### (b) Terms and debt repayment schedule (cont'd)

Finance lease liabilities are payable as follows:

	Minimum lease payments	Interest 2016	Present value of minimum lease payments	Minimum lease payments	Interest 2015	Present value of minimum lease payments
			US	\$'000		
Less than one year	127,212	43,727	83,485	132,494	50,054	82,440
Between one and five years	457,503	130,462	327,041	418,901	133,056	285,845
More than five years	319,989	51,873	268,116	333,541	68,010	265,531
	904,704	226,062	678,642	884,936	251,120	633,816

#### (c) Financial covenants

The new set of financial covenants agreed at the restructuring was as follows:

- 1) Minimum Liquidity The Company is required to have a monthly minimum liquidity (including amounts held in the reserve account that are available for general corporate purposes) in an amount of at least US\$ 125 million (tested on the last business day of each calendar month).
- 2) Fixed Charge Cover ratio The Company is required to have a certain Fixed Charge Cover ratio, which is defined as Consolidated EBITDAL to Fixed Charges. EBITDAL means Consolidated EBITDA (Group's Consolidated EBITDA, after certain adjustments as specifically defined in the facility agreements), after adding back charter hire lease costs. Fixed Charges mean mainly cash interest, scheduled repayments of indebtedness and charter hire lease costs.

This ratio will gradually increase from 1.02:1 on December 31 2015 to 1.07:1 on December 31, 2018 (based on last 12 months periods). Ratio levels will be tested quarterly from December 31, 2015.

3) Total Leverage ratio - The Company is required to have a certain Total Leverage ratio, which is defined as Total Debt to Consolidated EBITDA. This ratio will gradually decrease from 8.8:1 on 30 June 2015 to 4.9:1 on December 31, 2018 (based on last 12 months periods). Ratio levels will be tested quarterly from June 30, 2015.

During 2015 and 2016, due to deteriorating market conditions, the Company obtained amendments to the financial covenants described above, the most recent of which concluded lately in 2016. Accordingly, below are the current financial covenants that the Company is required to stand:

- 1) Fixed Charge Cover ratio The required ratio will be examined on March 31, 2018 onwards, and will gradually increase from 0.78:1 as required on March 31, 2018 to 0.99:1 as required on March 31, 2019 and remain in that level thereafter.
- 2) Total Leverage ratio The required ratio will be examined on March 31, 2018 onwards, and will gradually decrease from 23.69:1 as required on March 31, 2018 to 6.64:1 as required on December 31, 2018 and remain in that level thereafter.
- 3) Minimum Liquidity This covenant was amended as from March 31, 2016 to include all cash and cash equivalents available to the Company without any restrictions. In addition, during 2016 and through (and including) September 30, 2016 the Company was required to stand a minimum liquidity of US\$ 150 million. Starting December 31, 2016 the minimum Liquidity required is reinstated at US\$ 125 million.

### 12 Loans and other liabilities (cont'd)

#### (c) Financial covenants (cont'd)

Under these amendments, it was also determined that if the Company's performance improves and certain conditions are met, the Fixed Cover ratio levels and the Total Leverage ratio levels, as agreed at the restructuring, will be reinstated.

As at December 31, 2016, the Company is in compliance with its financial covenants. According to these consolidated Financial Statements, the Company's liquidity amounts to US\$ 182 million (Minimum Liquidity required is US\$ 125 million).

#### (d) Credit facility

In August 2015, the Company entered into a receivables securitization transaction (the "Transaction") with a financial institution (the "Financial Institution") for the sale of certain receivables, (the "Receivables"), generated from shipping services that meets certain criteria, to a foreign entity ("the SPV") which was established specifically for this purpose and which is neither owned nor controlled by the Group. The SPV financed the initial acquisition of the Receivables by means of (i) a senior facility (the "Senior Facility") provided to the SPV by the Financial Institution and (ii) a subordinated facility provided by the Company.

The Senior Facility commitment was of up to US\$ 100 million, originally available for 2.5 years from the closing date of the Transaction (i.e. until February 2018). The actual amount that can be drawn from the Senior Facility is dependent on certain criteria of the Receivables.

The SPV acquires new Receivables on a revolving basis, using mainly amounts paid for previously purchased Receivables. The Group manages (as servicer on behalf of the SPV) the collection of the Receivables included in the Transaction.

Once the Receivables are sold to the SPV, they are no longer owned by the Group. The securitization of the Receivables does not meet the conditions for derecognition of financial assets prescribed in International Accounting Standard (IAS) 39, Financial Instruments – Recognition and Measurement, since the Group did not transfer all of the risks and rewards deriving from the Receivables and retains continuing involvement with collection of the Receivables included in the Transaction. Therefore, the amounts drawn under the Senior Facility were presented as a financial liability as part of the short-term credit. In addition, The SPV is included in the consolidated financial statements since the Group has control, for accounting purposes, over the entity in accordance with the criteria determined in IFRS 10, Consolidated Financial Statement.

During the first half of 2016, the company made its first withdrawal and obtained amendments to prevent anticipated breaches of one of the transaction related covenants (Day Sale Outstanding Ratio). During the second half of 2016, the Company and the financial institution which provided the "Senior Facility", reached a mutual agreement, according to which all amounts previously drawn (in the total amount of US\$ 41 million) were repaid and the "Senior Facility" was terminated.

# **13** Employee benefits

#### (a) Composition

	2016	2015
	US\$'00	0
Present value of obligations (see section f below)	48,604	50,962
Fair value of the plan assets (see section f below)	(17,412)	(19,063)
Recognized liability for defined benefit obligations	31,192	31,899
Termination benefit-liability for early retirement	25,119	31,489
Other long-term benefits	11,065	11,539
Short-term benefits:		
Liability for annual leave	6,322	6,406
Current portion of liability for early retirement	8,349	9,625
Total employee benefits	82,047	90,958
Presented in the statement of financial position as follows:		
Short-term (Note 14)	14,671	16,031
Long-term	67,376	74,927
	82,047	90,958

#### (b) Defined contribution pension plans

According to the Israeli Severance Pay Law - 1963, an employee who is dismissed, or who reaches the retirement age, is entitled to severance payments, in a sum equal, in essence, to  $8\frac{1}{3}\%$  of his last monthly salary multiplied by the actual months of employment (hereinafter – "Severance Obligation").

The Severance Pay Law allows employers to be relieved from part or all of the Severance Obligation by making regular deposits to pension funds and insurance companies, if it is approved (beforehand) by a relevant regulation or Collective Agreement.

The Group makes regular deposits to pension funds and insurance companies. With respect to some of its employees, the Group makes such payments replacing its full Severance Obligation regarding those employees and, therefore, treats those payments as if they were payments to a defined contribution pension plan. With respect to most of the other employees, the Group makes such payments replacing only  $(6\%)/(8^{1}/3\%)$  of the respective Severance Obligation. Therefore, the Company treats those payments as payments to a defined contribution pension plan and treats the remainder  $(2^{1}/3\%)/(8^{1}/3\%)$  as payments to a defined benefit pension plan.

#### (c) Defined benefit pension plan

(i) The post-employment liability included in the statement of financial position represents the balance of liabilities not covered by deposits and/or insurance policies in accordance with the existing labour agreements, the Severance Pay Law and the salary components which Management believes entitle the employees to receipt of compensation.

To cover their pension and severance liabilities, the Company and certain of its subsidiaries make regular deposits with recognised pension and severance pay funds in the employees' names and purchase insurance policies.

The reserves in compensation funds include accrued linkage differentials (for Israeli CPI), interest accrued and deposited in compensation funds in banks and insurance companies. Withdrawal of the reserve monies is contingent upon fulfilment of detailed provisions in the Severance Pay Law.

(ii) Group retirees receive, in addition to the pension payments, benefits which consist mainly of a holiday gift and vouchers. The Group's liability in respect of these costs accumulates during the service period. The contractual costs are in respect of the post-employment period, based on an actuarial calculation for existing retirees and for the serving employees entitled to this benefit according to their contractual retirement age.

#### 13 **Employee benefits (cont'd)**

#### (d) Other long-term employee benefits

#### **Provision for annual absence** (i)

Under the labour agreement, employees retiring on pension are entitled to certain compensation in respect of unutilised annual absence. The provision was calculated on the basis of actuarial calculations. The actuarial assumptions include those noted in section (g) below, as well as assumptions in connection with this section based on the Group's experience according to the likelihood of payment of annual absence pay at retirement age and utilisation of days by the LIFO method.

#### Company participation in education fees for children of employees studying in higher (ii) educational institutions

Under the labour agreement, employees are entitled to the participation of the Company in education fees for their children. The provision was calculated on the basis of actuarial calculations. The actuarial assumptions include those noted in section (g) below, as well as assumptions in connection with this section based on the Company's experience according to the likelihood of payment of educational fees.

#### Benefits in respect of severance and voluntary early retirement **(e)**

According to agreements reached with certain employees who retired early, these employees are entitled to a pension from the Group until they reach regular retirement age. A provision, computed on the basis of the present value of the early retirement payments is included in the Consolidated Statement of Financial Position.

As to early retirement plan agreed in 2014, see (h) below.

#### Movement in the present value of the defined benefit pension plan obligation **(f)**

	2016	2015
	US \$'	000

	17,412	19,063

#### NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

#### 13 **Employee benefits (cont'd)**

#### **Actuarial assumptions (g)**

The principal actuarial assumptions at the balance sheet date:

- (i) Annual resignation and dismissal rates were determined on the basis of the past experience of the Group; for employees of the Company the resignation rate is estimated between 3%-7% and the dismissal rate is estimated between 1% and 3%. For the subsidiaries, the resignation rate is estimated at between 2.6% and 4% and the dismissal rate is estimated at between 2% and 2.6%.
- (ii) The relevant discount rates are as follows:

,	2016	2015	2014
Early retirement	1.9%-2.2%	2.1%-3.9%	0.6%-1.9%
Annual absence	3.9%-4.2%	3.1%-4.1%	2.8%-3.1%
Long service gift	3.2%-3.9%	3.7%-3.8%	3.1%-3.6%
Tuition fees	2.3%-3.2%	2.6%-3.8%	1.4%-2.4%
Defined benefit plan	1.8%-4.4%	3.6%-4.4%	2.2%-4.1%

(iii) Assumptions regarding future salary growth were made on the basis of the Group's experience and management's assessments. The Company - for on shore employees the average future salary growth increment is 3.5%, for off - shore employees the average future salary growth increment is 4%.

The subsidiaries - average future salary growth increments for employees is between 2% and 4%.

Assumptions regarding future morality are based on published statistics and morality tables.

- (iv) The overall contractual long-term rate of return on assets is between 3.4% and 3.9% per year in 2016 and 2015, and between 2.2% and 2.7% per year in 2014. The contractual long-term rate of return is based on the portfolio as a whole and not on the sum of the returns on individual asset categories. The return is based exclusively on historical returns, without adjustments.
- (v) Sensitivity analysis

Reasonably possible changes at the balance sheet date to one of the relevant actuarial assumptions, holding other assumptions constant, would have affected the defined benefit obligation by the amounts shown below. . ..

	Defined benefit obligation	
	At December 31, 2016	
	Increase	Decrease
	US \$'(	000
Discount rate (0.5% movement)	(1,428)	1,428
Future salary growth (0.5% movement)	1,628	(1,628)

As at December 31, 2016, the weighted average duration of the defined benefit obligation was 8 years (as at December 31, 2015 - 9 years).

In 2017, the Group expects to pay about US\$ 733 thousands in contributions to the funded defined benefit pension plan.

- As part of the Company's 2014 restructuring, an additional early retirement plan was agreed (h) with the employees union. The liability in respect of such plan, in an amount of US\$ 23 million, was recognized during the third quarter of 2014 under "termination benefit expenses".
- The Company approved a compensation plan for the Company's employees and all of its **(i)** management (the "Plan") for the year 2015, composed of increases in salaries as well as cash bonuses. The payment of cash bonuses under the Plan is subject to the satisfaction of certain pre-conditions, such as profitability and minimum EBITDA. As such pre-conditions were not met, no expenses were incurred in 2015 with regards to this plan. In addition, the Company is committed to pay, to certain executives, a bonus in case of an IPO or M&A transaction, as defined in the agreements.

# 14 Trade and other payables, including derivatives

	2016	2015
	US\$'00	0
Trade payables	261,558	266,105
Other payables		
Liabilities to employees and other liabilities		
for salaries	5,818	8,283
Provision for annual leave and early retirement (see Note 13(a))	14,671	16,031
Government institutions	9,805	10,868
Accrued interest	3,600	2,551
Accrued expenses	18,319	7,615
Payables and other credit balances	22,258	30,472
	74,471	75,820
Derivatives not used for hedging		3,264
	336,029	345,189

All of the trade and other payables are contractual to be settled within one year or are repayable on demand. The Group's exposure to currency, liquidity and market risks related to trade and other payables is disclosed in Note 28.

# **15 Provisions**

	2016
	US \$'000
Balance at the beginning of the year	31,560
Provisions made during the year	3,045
Provisions used during the year	(3,986)
Provisions reversed during the year	(3,046)
Balance at the end of the year	27,573

#### Legal and employee claims

For legal claims filed against the Group see Note 26.

#### **Claims covered by insurance**

Claims covered by insurance represent mainly provision for damage to cargo of customers that was shipped in containers at the responsibility of the Company. The Company has agreements with insurance companies that indemnify it in respect of such damages (other than the self participation provided in the insurance agreements). Regarding assets that were recognised in respect thereto, see Note 8, under insurance recoveries.

Total income taxes in income statements	18,366	(1,893)	(18,935)

(\*) In respect of 2014, see Note 1(b)(ii)(k).

# (b) Reconciliation of effective tax rate

The reconciliation is based on the Company's domestic tax rate.

	2016	2015	2014
		US \$'000	
Profit (loss) for the year	(163,501)	6,536	(198,143)
Less, share of profits of associates	(103,301) (5,001)	(9,397)	(12,495)
Income taxes	18,365	(1,893)	(12,4)5)
Loss excluding income taxes	(150,137)	(4,754)	(229,573)
Income tax using the domestic corporation tax rate Current year losses for which no deferred tax asset	(37,534)	(1,260)	(60,837)
was recognized	50,022	11,888	152,680
Effect of tax rates in foreign jurisdictions	8,617	8,802	8,731
Non-deductible expenses	307	537	(1,930)
Effect of different tax rates on specific gains Tax losses carry forward which were utilized during the year for which no deferred tax assets	(3,874)	(1,873)	(739)
were created in previous years.			(118,190)
Taxes in respect of previous years (**)		(21,704)	1,258
Other	828	1,717	92
	18,366	(1,893)	(18,935)

(\*\*) In 2015, mainly related to a reversal of subsidiary's tax provision due to statute of limitation, see also (a) above.

# 24 Income tax (cont'd)

# (c) Deferred tax assets and liabilities

# (1) **Recognised deferred tax assets and liabilities**

Deferred tax assets and liabilities are attributable to the following:

	Ass	ets	Liab	ilities	N	et
	2016	2015	2016	2015	2016	2015
Vessels, containers, handling equipment and other tangible assets (*) Financial liabilities Employee benefits	18,774 17,218	24,134 22,280	(178,607)	(206,213)	(178,607) 18,774 17,218	(206,213) 24,134 22,280
Tax losses carry-forwards Other items	147,483	164,059	(4,190)	(3,565)	147,483 (4,190)	164,059 (3,565)
Net deferred tax (assets) /liabilities	183,475	210,473	(182,797)	(209,778)	678	695
Net deferred tax assets recognised in the statement of the financial position Net deferred tax liabilities recognised in the statement of					1,032	1,034
the financial position					(354)	(339)
_					678	695

(\*) In accordance with Israeli Income Tax Regulations the Group is entitled to deduct depreciation on vessels and related equipment at a higher rate than that recorded in the financial statements.

#### (2) Unrecognised deferred tax assets

On December 31, 2016 there are carry forward tax losses in the amount of US\$ 2,384 million (2015: US\$ 2,187 million, 2014: US\$ 2,224 million).

Deferred tax assets have not been recognised in respect of the tax losses, in the amount of US\$ 406 million at December 31, 2016 (2015: US\$ 418 million, 2014: US\$ 412 million) since it is not probable that future taxable profits will be available against which the Group can utilise the benefits therefrom.

Under existing Israeli tax laws, there is no time limit on utilising tax losses.

# 24 Income tax (cont'd)

#### (d) Movement in deferred tax assets and liabilities during the year

	Vessels containers handling equipment and other tangible assets	Financial liabilities	Employee benefits	Accumulated tax losses	Other items	Total

#### (e) Amendments to the Israeli Income Tax Ordinance

Presented here under are the tax rates relevant to the Company in the years 2014-2016: 2014 - 26.5%

 $\begin{array}{c} 2015-26.5\%\\ 2016-25\% \end{array}$ 

On January 4, 2016 the Knesset plenum passed the Law for the Amendment of the Income Tax Ordinance (Amendment 216) - 2016, by which, inter alia, the corporate tax rate would be reduced by 1.5% to a rate of 25% as from January 1, 2016. Furthermore, on December 22, 2016 the Knesset plenum passed the Economic Efficiency Law (Legislative Amendments for Achieving Budget Objectives in the Years 2017 and 2018) – 2016, by which, inter alia, the corporate tax rate would be reduced from 25% to 23% in two steps. The first step will be to a rate of 24% as from January 2017 and the second step will be to a rate of 23% as from January 2018. As a result of the reduction in the tax rate from 26.5% to 23% over the above mentioned period, the deferred tax balances as at December 31, 2016 were calculated according to the tax rate expected to apply on the date of reversal.

#### (f) Tax assessments

The tax assessments of the Company through (and including) the year 2012 are considered to be final.

# 25 Commitments

Commitments in respect of the chartering of vessels and their equipment and others. As at December 31, 2016, the projected future charter and operating lease payments are as follows:

	<b>Related party</b>	Other	Total
	U	S\$ million	
2017	20	168	188
2018	16	136	152
2019	11	92	103
2020	9	57	66
2021	9	25	34
2022 and thereafter	4	61	65
	69	539	608

Lease payments are mainly in United States dollar.

See also Note 1(b)(i)(p), with regards to containers operational leases, reclassified as financial leases.

# 26 Contingencies

- (a) As at December 31, 2016, the Company is a party to arbitrations and legal claims (not including the below, as well as claims in the ordinary course of business, which are covered by insurance and in respect of which the Company has included a provision in the amount it is likely to bear, based on past experience) in the total amount of approximately US\$ 4 million. Regarding the provision recognized in respect of the arbitrations, legal and insurance claims- see Note 15.
- (b) The Company was involved as a respondent in an application for the approval of a derivative action filed to the District Court by several shareholders (hereinafter- "the plaintiffs") of the Israeli Corporation Ltd. ("IC").

During 2012 the parties reached a compromise, which was approved by the court, according to which the Company undertook to pay to IC an amount of US\$ 12 million (NIS 45 million) subject to certain terms and conditions, as agreed.

In light of the fact that the payment is contingent upon the occurrence of future conditions that have not yet taken place (such as among others, the existence of retained earnings and compliance with the distribution terms), the Company did not record any provision for such settlement.

# (c) Derivative Action - 2014

During 2014 a petition for approval of a derivative action was submitted to the District Court in Tel Aviv by a shareholder of IC against, among others, IC and the Company. The petitioner argues that the transaction executed by IC in connection with its participation in the Company's restructuring deviates from the approval of IC's shareholders meeting and that the condition precedent to the execution of IC's participation in the restructuring, as approved by such meeting, regarding the transferability of the shares in the Company was not fulfilled. The petitioner moves to have the defendants (other than IC and the Company) to convene IC's shareholders meeting or have the defendants (other than IC and the Company's restructuring or have the defendants (other than IC) compensate IC in the amount of US\$ 27.4 million which, as argued, reflects the damage caused to IC due to its participation in the Company's restructuring, being the decreased value of the Company's shares held by IC in consideration therefore, due to the incompletion of the said condition precedent. During 2016, the derivative action was rejected by the court, followed by an appeal filed by the petitioner. Management believes, based on its legal advisors, that it is more likely than not that the appeal will be rejected. Therefore no provision was recorded in relate to the said derivative action.

#### 26 Contingencies (Cont'd)

#### (d) Class Action - 2016

During 2016, the Company's wholly-owned agency in Israel, along with other third party shipping agencies, has been served with a filing of a class action. The Applicant alleges, among other things, that for the last seven years the agency has, in breach of the Port Regulations, charged their customers for services rendered by higher rates than allowed, as well as charged for services which are not included in the list of services detailed in the aforesaid regulations. At this early stage, management, based on its legal advisors is unable to estimate the probability or the effect of an adverse outcome of this class action on the Company's business, if any. Therefore no provision was recorded in relate to the said class action.

#### 27 Related parties

After the completion of the Company's debt restructuring, IC holdings in the Company's issued share capital were diluted from approximately 99.7% to 32%. As a result, as of the restructuring date, IC has no longer control, but rather a significant influence over the Company (see Note 1(b)(i)). In January 2015, IC transferred all of its holdings in the Company's shares to Kenon (see also Note 11(c)) which has a significant influence over the Company since that date.

Furthermore, according to 2014 restructuring, the financial creditors and ship owners received, among other things, shares aggregating to 68% of the Company's issued share capital (see Note 1(b)(h)).

#### 28 Financial risk management

#### Overview

The Group has exposure to the following risks from its use of financial instruments:

- Credit risk
- Liquidity risk
- Market risk

This Note presents information about the Group's exposure to each of the above risks, the Group's objectives, policies and processes for measuring and managing risk and the Group's management of capital. Further quantitative disclosures are included throughout the Financial Statements.

In order to manage these risks and as described hereunder, the group executes from time to time transaction in derivative financial instruments.

The CFO has overall responsibility for the establishment and oversight of the Group's risk management framework. The Company's Board of Directors has established Finance Committee. The Finance Committee is dealing with certain financial reporting aspects of the Group's activities and monitoring the Group's hedging policies. The committee reports to the Company Board of Directors on its activities.

As at December 31, 2015, the fair value of derivative transactions for fuel prices hedges (level 2 measurement) in an amount of US\$ 3.3 million are presented under current liabilities (As at December 31, 2016, no transactions were outstanding).

Fair value of fuel options is measured based on Black Sholes model. Fair value of fuel swap contracts is measured by discounting the future cash flows over the period of the contract using risk free interest rates based on zero coupon US treasury bond.

#### (a) Credit risk

#### Trade and other receivables

The Group's exposure to credit risk is influenced by the individual characteristics of each significant customer. The demographics of the Group's customer base, including the default risk of the industry and country, in which customers operate, has also an influence on credit risk.

The income of the Group is derived from income from voyages and services in different countries worldwide. The exposure to a concentration of credit risk with respect to trade receivables is limited due to the relatively large number of customers, wide geographic spread and the ability in some cases to auction the contents of the container, the value of which is most likely to be greater than the outstanding debt. The maximum exposure to credit risk is represented by the carrying value of each financial asset, in the statement of financial position.

The Group has established a credit policy under which each new credit customer is analysed individually for creditworthiness before the Group's standard payment and delivery terms and conditions are offered. The Group's review includes financial analysis from external sources. Credit limits are established for each customer, which represents the maximum open amount approved by the relevant level of authorisation. These limits are reviewed periodically, at least once a year. Customers that fail to meet the Group's benchmark creditworthiness may transact with the Group only on a cash basis.

Most of the Group's customers have been transacting with the Group for a few years and losses have occurred infrequently. Trade and other receivables relate mainly to the Group's wholesale customers. Customers that are graded as "high risk" are placed on a restricted customer list and future sales are made on a cash basis, unless otherwise approved by the credit committee.

In some cases, based on their robustness, customers are requested to provide guarantees.

Specific provisions for doubtful debts are made to reflect the potential losses inherent in debts whose collection is doubtful in management's estimation.

# 28 Financial risk management (cont'd)

#### (a) Credit risk (cont'd)

#### Investments

The Company's policy is to invest its cash surplus mainly in time deposits in US dollar.

The funds are deposited in Israeli banks with local rating of AA-/Aa3 (or better) and in international banks with rating of A-/A3 (or better).

The investment policy is reviewed from time to time by the Company's finance committee and the board of directors, and is subject to change.

#### Exposure to credit risk

The carrying amount of financial assets represents the maximum credit exposure. Security and other credit enhancements:

As at December 31, 2016 credit to retail customers in the amount of approximately US\$ 71 million is guaranteed by credit insurance.

# (b) Liquidity risk

The following are the contractual maturities of financial liabilities, including estimated interest payments:

		December 31, 2016					
	Note	Carrying amount US \$'000	Contractual cash flows US \$'000	0-1 years US \$'000	1-2 years US \$'000	2-5 years US \$'000	More than 5 years US \$'000

# 28 Financial risk management (cont'd)

#### (c) Market risk

The Group buys and sells derivatives in order to manage market risks.

#### (1) Currency risk

The Group is exposed to currency risk on purchases, receivables and payables where they are denominated in a currency other than the United States dollar.

The Group's exposure to foreign currency risk was as follows based on notional amounts:

	December 31, 2016		
	US\$	NIS	Others
	US\$'000	US\$'000	US\$'000
Non-current assets			
Trade and other receivables	1,460		2,100

(\*) Excludes derivatives (shown separately).

### 28 Financial risk management (cont'd)

#### (c) Market risk (cont'd)

#### (1) Currency risk (cont'd)

#### Sensitivity analysis

A 10 percent strengthening of the United States dollar against NIS at December 31 would have increased / (decreased) equity and profit or loss by the amounts shown below. This analysis assumes that all other variables, in particular interest rates, remain constant. The analysis has been performed on the same basis for 2016 and 2015.

	Equity/
	Profit or loss
	US \$'000
December 31, 2016	5,584
December 31, 2015	5,059

A 10 percent weakening of the United States dollar against the NIS on December 31 would have had the equal but opposite effect on the above currencies to the amounts shown above, on the basis that all other variables remain constant.

#### (2) Interest rate risk

The Group prepares a summary of its exposure to interest rate risk on a periodic basis.

At the balance sheet date the interest rate profile of the Group's interest-bearing financial instruments was:

	Carrying amount		
	2016	2015	
	US \$'000	US \$'000	
Fixed rate instruments			
Financial assets	186,770	370,360	
Financial liabilities	(1,168,984)	(1,119,035)	
	(982,214)	(748,371)	
Variable rate instruments			
Financial liabilities	(156,809)	(216,642)	
	(156,809)	(216,642)	

#### Fair value sensitivity analysis for fixed rate instruments

The Group does not account for any fixed rate instruments at fair value through profit or loss.

#### Cash flow sensitivity analysis for variable rate instruments

A 10% change in variable interest rates at the balance sheet date would not have significant influence over the Company's equity and profit or loss (assuming that all other variables, in particular foreign currency rates, remain constant).

#### (3) Other market price risk

The Group does not enter into commodity contracts other than to meet the Group operational needs. These transactions do not meet the criteria for hedging for accounting purposes and therefore the change in the fair value is recognised directly in profit or loss.

**F** • • • •

# 28 Financial risk management (cont'd)

#### (d) Fair value

#### (1) Financial instruments not measured at fair value

The carrying amounts of certain financial assets and liabilities, including cash and cash equivalents, trade receivables, other receivables, other short-term investments, deposits, derivatives, bank overdraft, short-term loans and borrowings, trade payables and other payables are the same or proximate to their fair value.

The fair values of the remaining financial assets and liabilities, together with the carrying amounts including their levels in the fair value hierarchy shown in the statements of financial position, are as follows:

		December 31, 2016		December	ber 31, 2015		
		Carrying amount	Fair value Level 2	Carrying amount	Fair value Level 2		
	Note	US \$'000	US \$'000	US \$'000	US \$'000		
Debentures Long-term loans and other	12(a)	(437,021)	(401,285)	(428,003)	(384,662)		
liabilities (*)		(849,320)	(835,966)	(798,733)	(798,382)		

#### (\*) Excluding derivatives.

The valuation technique which is used in order to measure the fair value was the discounted cash flows technique. The interest rates used to discount estimated cash flows, were estimated by external evaluator based on a synthetic rating calculated using accepted methodology and considering rating-appropriate interest rate curves, and were as follows:

	2016	2015	
	US \$'000		
Debentures - US dollar linked	7.27%-9.03%	6.59%-9.14%	
Loans and other liabilities (mainly United States dollars)	2.83%-11%	2.82%-11.25%	

## (2) Financial instruments measured at fair value

When measuring the fair value of an asset or a liability, the Company uses market observable data as far as possible. Fair values of categorized into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

- Level 1: quoted prices (unadjusted) in active markets for identical instruments.
- Level 2: inputs other than quoted prices included within Level 1 that are observable, either directly or indirectly.
- Level 3: inputs that are not based on observable market data (unobservable inputs).

As at December 31, 2016 and 2015 such analysis is immaterial.

#### (3) Level 3 financial instruments carried at fair value

As at December 31, 2016 and 2015 such analysis is immaterial.

# 29 Significant accounting estimates and judgements

The significant accounting estimates and judgements are as follows:

#### (i) Assessment of impairment of non-current assets

The Group assesses the recoverable amount of non-current assets based on their fair value less costs of disposal. Fair value is the price that would be received to sell the asset in an orderly transaction in the principal (or most advantageous) market at the measurement date under current market conditions (i.e. an exit price). The fair value is determined using the discounted cash flow method and takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use. Regarding the significant assumptions used in the valuation see also Note 5.

### (ii) Recognition of deferred tax assets in respect of tax losses

Management of the Company evaluates whether it is probable that in the foreseeable future there will be taxable profits against which losses can be utilized and accordingly it recognizes (or does not recognize) deferred tax assets. For further information on losses for which a deferred tax asset was not recognized, see Note 24 regarding taxes on income.
